

Greenhouse Mastery Starts Here, BloomTrack Pro your Essential Tool for Greenhouse Success

improve efficiency with this strong, Wi-Fi and GSM-connected system, perfect for small to mid-sized and organic farms.

BloomTrack Pro Benefits

- Easy integrates with Wi-Fi and GSM networks, ensuring reliable data transmission for real-time monitoring.
- Equipped with advanced sensors for accurate and precise measurement of relative humidity and temperature.
- With a strong design and a lifespan of 4-5 years.
- Easy interface and functionality.
- Suitable for a range of applications, from small to mid sized greenhouses and organic farming to educational demonstrations.

BloomTrack Pro Features

Relative humidity sensor

Range: 0 – 85%

Temperature sensor

Range: 0 – 50 C

Light intensity sensor

Range: 0 – 65535 lux

Control Unit

You can control greenhouse equipment such as fans, Straws, Cooling panels, Shade panels that the greenhouse needs.
